

## Computer Thorax Trainer Pro and Elit

ThoraxTrainer® comes with two computer versions - PRO and ELITE - both with colour touchscreen.

They both gives you the opportunity to evaluate your training in details. The PRO computer measures power, speed, distance, heartrate, calories, frequency, and derived variables.

The ELITE computer has a pacer function, which gives the opportunity to compete against your own best results or setting interval training definitions. The computer is easily calibrated to secure reproducibility in measurements. All training data can be stored on a SD-card and transfered to your PC for further evaluation in the advanced ThoraxTrainer® analyzer software program.

By connecting 2-8 ThoraxTrainer® ELITE you can race against each other through the computer.

### The computer measures:

#### The PRO version:

- Time
- Distance
- Speed (time/1000m, km/h) - Average speed - Max. speed
- Watt - Average watt - Max. watt
- Heart rate
- Frequency/Stroke rate
- Graphic display of Watt

Rec. Price: 995 Euro

#### The ELITE version:

- Time
- Distance
- Speed (time/1000m, km/h) - Average speed - Max. speed
- Watt - Average watt - Max. watt - watt/kg
- Heart rate - Average heart rate
- Frequency/Stroke rate
- Graphic display of Watt
- Interval Training
- Session Status
- Pacer Function
- Analyzer software for

Rec. Price: 1198 Euro
